PUBLIC NOTICE

Notice is hereby given to the community of Barkly West that the municipality is experiencing challenges with high turbidity of water from the Vaal River. This is as a result of heavy rains we are currently experiencing. To achieve normality on turbidity the municipality must put certain measures in place including change of chemicals and ensuring maximum retention period within our Water Treatment Works. In addition the municipality is planning to reduce the abstraction rate of water from the river to reduce the turbidity over and above the municipality will be cleaning reservoirs and do forced maintenance as a result of the state of the Vaal River affecting our water turbidity.

Dikgatlong Municipality hereby gives notice that the municipality will suspend conventional water system on Thursday 24 April 2025 and Friday 25 April 2025. This is because the municipality is compelled to undergo a forced maintenance and cleaning of both our reservoirs and the settling tanks within at our WTW on the mentioned dates. This means there will be no water supply from 06h00 Thursday morning until 17h00 Friday afternoon.

Please take note that water tankers will be dispatched to the affected areas to provide clean drinkable water from Wednesday, 23 April 2025 to Friday, 25 April 2025.

We apologise for any inconvenience caused.

KENNISGEWING

Hiermee wil Dikgatlong Munisipaliteit kennis gee dat daar geen watertoevoer sal wees op Dondersdag, 23 April en Vrydag 24 April 2025 rede hiervoor is dat die werkers die damme {Reservoirs} sal skoonmaak op daardie twee (2) dae. Water sal af wees vanaf 08h00 Dondersdag oggend tot en met 17h00 Vrydag middag.

Water trokke sal beskikbaar wees op hierdie 2 dae. Die rede waarom waterbeperking geïmplementeer word, is om troebelheidsvlakke by ons reservoirs te verminder. Tweedens het die hoe troebelheidsvlakke voorgekom as gevolg van swaar reënval.

Ons vra hartlik omverskoning vir die ongerief.
