**Barkly West, 8375**

Closing Date and Time:
**Monday, 08 June 2026 at 12:00**

**Late submissions will not be accepted.**

## BACKGROUND AND SPECIFICATIONS/ SCOPE OF WORK PURPOSE

## BACKGROUND

The Electrical Department performs daily maintenance and emergency fault repairs on low voltage and overhead power lines. Employees are currently facing challenges when working on heights and handling live line operations due to the shortage of suitable equipment. A fibreglass adjustable step ladder is required because fibreglass material is non-conductive and safer for electrical work compared to ordinary metal ladders. The adjustable ladder will also assist employees when working on uneven ground and different pole heights during maintenance and fault repairs. The telescopic stick is required for safe operation and handling of electrical components from a safe distance. It assists employees to isolate, test, and perform switching operations on power lines while reducing the risk of electrical shock and injuries.

## SPECIFICATIONS

## 1. TELESCOPIC STICK

**SAMPLE PICTURE**

| Items | Description | Colour | Quantity |
|---|---|---|---|
| 1. | insulating link stick for Medium Voltage Overhead Network (4- 36 KV) with a complete range of accessories namely; operating hooks, voltage detector, trees trimmer. | Orange | 1 |
