BACKGROUND AND SPECIFICATIONS

BACKROUND

The Municipality has experienced repeated theft of Airdac cables supplying households, particularly at road crossings. In several locations, the cables were installed where they could be easily reached and removed by thieves. As a result, affected households remain without electricity.

Reinstalling the cables in the same manner would expose them to further theft and result in repeated replacement costs. Kicker poles are therefore required to support the Airdac cables at a safe height and make them less accessible. They will also assist in maintaining the required electrical and road-crossing clearances.
